MARINE-MOLY™

MOLYBDENUM DISULFIDE PASTE

DESCRIPTION

MARINE-MOLY™ is a specially formulated Molybdenum Disulfide (MoS_2) marine lubricating paste that provides a low friction shield by "plating" to metal surfaces to reduce bearing temperature, protect working parts, prevent galling and heat freeze. Very tenacious, it may be applied by brush or spatula to hot surfaces without running or dripping off.

MARINE-MOLY is extremely resistant to water, withstands extreme weather elements and helps prevent corrosion on metal exposed to water, steam, salt spray, etc. **MARINE-MOLY** has a 300,000 psi film strength.
